

OFFICE OF THE SECRETARY, STORES PURCHASE COMMITTEE, 'ASIATIC' BUILDING, KEMPEGOWDA ROAD, BANGALORE-2.

Dated 16th February 1954.

To

The Firms dealing in Electric Fans,

Enquiry No. 12208.

Subject:—Rate Contract for supply of Table Fans and Ceiling Fans to Government Departments during 1954-55.

Gentlemen,

No. S.P.C. 58701-40. Please be good enough to intimate your best prices and the earliest time of delivery for the materials described below

It should be distinctly understood that the acceptance by us of your quotation will be subject to the following conditions:—

Withdrawal from the quotation after it is accepted or failure to make the supply within the specified time or according to specifications will entail cancellations of the order and purchases being made at your expense from other sources in addition to the levy of a penalty of 3 per cent of the value of the order as and by way of liquidated damages. In such an event, the Stores Purchase Committee reserve the right to remove your name from the list of approved firms.

The quotations should be superscribed "Quotations for Table Fans and Ceiling Fans" with the above enquiry number.

This enquiry will be closed on the 15th March 1954.

SCHEDULE.

Specification for Induction Type, Oscillating desk or Pedestal Fans.

1. The fans covered by this specification are required for use on:—

1. 220 volts, single phase, 25 cycles.
2. 200 volts, single phase, 60 cycles and 50 cycles.
3. 110 volts, single phase, 25 cycles.

2. They shall be manufactured in accordance with the latest B.S.I. Specification No. 380 and shall fully conform to the general specification given below:—

3. Tenders shall be accompanied with descriptive literature, illustration or photographs of the fans and regulators offered without which no tender will be considered. Tenderers will fill in the accompanying data form and submit it along with their tenders.

4. This specification applies to desk type fans suitable for use under Indian Climatic conditions.

5. *Quality of materials and workmanship*:—All materials used in the construction of the equipment forming part of the contract are to be of the best quality and workmanship suitable for continuous operation in the tropical climate of India, where the ambient temperature may be taken as 50°C.

6. It is to be noted that the insulating materials used shall be of Class 'A'. The fans shall have the highest class finish and shall be smoothly painted with three coats and finished in best quality hard stoved black or dark green cellulose enamel.

7. *Interchangeability*:—Corresponding parts of similar fans, regulators, etc., are to be absolutely interchangeable in every respect.

8. *Motor*:—The motor shall be of the induction type and totally enclosed, wound for the voltage and frequency specified.

9. *Blades and Guards*:—The blades shall be of polished brass lacquered or Steel copper oxidised or any other approved material, shaped to give maximum volumetric efficiency, thoroughly stiff and well balanced to obviate troubles due to vibration. The fan shall have four blades mounted on a suitable spider. A strong and efficient brass or copper oxidised guard, with rings reasonably close to each other constructed of wire of sufficient thickness shall be fitted to prevent accidental contact with the blades.

10. *Bearings and Lubrication*:—The bearings shall be of the ball or roller type mounted in suitable housings. The bearings are to be self-lubricating by means of self-feeding grease and should be easily renewable. The fan should be so designed as to provide an efficient and simple

lubricating system which does not require to be oiled or greased for long periods.

11. *Shafts*:—The shaft shall be of mild steel and of sufficient diameter to prevent hording under all ordinary conditions of working and rough usage. The design of the fans shall be such that they are reasonably silent in operation and no grease or oil shall splash or be thrown out.

12. *Starting and Regulating Switch*:—The fan is to be supplied with a separate starting and regulating switch self-contained and fixed in the pedestal. The regulator should provide for at least three speeds, with an 'off' position. The switch handle of approved insulating material shall be so placed that it can be easily and conveniently manipulated. The design shall be such that if the regulator is left in any position for an indefinite period, the temperature rise in any part thereof shall not exceed the limit specified in B.S.I. No. 380.

13. *Starting*:—The fan shall be capable of starting up from rest when 80 per cent of the rated voltage is applied to the terminals.

14. *Extent of work*:—Each fan shall be complete with all the necessary fittings and accessories including the regulator.

15. *Pedestal and Trunnion*:—The pedestal and trunnion shall be of good quality malleable iron or cast steel of robust construction. The fan shall be readily adjustable for operation as either desk or bracket fan, and must have a wide range of both swivel and trunnion movement. All clamping devices shall be of strong and simple design, and so arranged that they shall not work loose owing to vibration or any other cause.

16. *Oscillating Mechanism*:—The fan shall be provided with an oscillating mechanism which shall not absorb more than 5 per cent of the rated electrical input.

17. *Name plate*:—Each fan shall carry a metal nameplate properly rivetted or securely fixed and distinctly marked with the following particulars:—

1. Name of manufacture.
2. Serial number.
3. Type Mark.
4. Voltage Range.
5. Frequency.

18. *Tests*:—The fans shall be tested before despatch in accordance with B.S.I. No. 380 and copies of test certificate signed by a responsible officer of the manufacturers shall be submitted.

19. Should the fans not conform to the requirements of this specification or should any fan or its fittings fail to stand satisfactorily the tests specified above, such fan or fans shall be rejected.

20. *Guarantee*:—A guarantee shall be furnished for the satisfactory operation and also for free replacement of such of the parts that prove faulty by reason of inherent defects in design or workmanship or material within one year after their receipt.

21. *Drawings, etc.*:—Outline plans giving all important overall dimensions of the fan and regulator, showing details of the lubricating system, etc., shall be submitted with the tender.

APPENDIX.

The following schedule shall be filled in while tendering:—

Description	Particulars	Remarks
1 Make of fan and country of manufacture	.....	.....
2 Type of fan	.....	.....
3 Rated voltage and frequency	.....	.....
4 Rated watts taken by the fan at full speed and rated volts	.....	.....
5 Full speed R.P.M.	.....	.....
6 Speed variation in R.P.M. of fan at different points of the regulator	.....	.....
7 Air delivery in cubic feet per minute	.....	.....
(1) at rated full speed	.....	.....
(2) at rated 2nd speed	.....	.....
(3) at rated 3rd speed	.....	.....
8 Maximum air velocity	.....	.....
9 Sweep and number of blades, the material of which they are made and thickness	.....	.....
10 The maximum rate of oscillation in degrees when the fan is oscillating in a horizontal plane	.....	.....
11 Number of contacts provided on the regulator	.....	.....
12 Type of motor	.....	.....
13 Type of bearings	.....	.....
14 System of lubrication	.....	.....
15 Type and particulars of conductors used for the motors	.....	.....

*Specification for Induction type Ceiling Fans with Regulators*

1 The fans covered by this specification are required for use on :—

1. 220 volts, single phase, 25 cycles.
2. 220 volts, single phase, 60 cycles and 50 cycles.
3. 110 volts, single phase, 25 cycles.

2 They shall be manufactured in accordance with the latest B.S.I. specification No. 367 and shall fully conform to the general specification given below :—

3 The tenders shall be accompanied with descriptive literature, illustrations, or photographs of the fans and regulators offered, without which no tender will be considered. Tenderers shall fill in the accompanying data form and submit it along with their tenders.

4 The specification applies to Ceiling Fans suitable for use under Indian climatic conditions and is limited to fans having a blade sweep between 36 inches and 60 inches.

5 *Quality of material and workmanship.*—All materials used in the construction of the equipment forming part of the contract are to be of the best quality and workmanship suitable for continuous operation in the tropical climate of India, where the ambient temperature may be taken as 50°C.

6 It is to be noted that the insulating materials used shall be of class 'A'.

7 No combustible material is to be used in the construction of the regulator, choke coils and resistances.

8 The fans shall have the highest class finish using the best quality stoved enamel.

9 *Interchangeability.*—Corresponding parts of similar fans regulators, etc., are to be absolutely interchangeable in every respect.

10 *Motor.*—The motor shall be of the induction type and be enclosed in such a manner as to be dust-proof and to preclude the entry of water or other liquid dripping from above.

11 *Blades.*—The blades shall be of approved materials and finish and so shaped as to give the maximum spread of air.

12 *Bearings and Lubrication.*—The bearings shall be of the ball or roller type mounted in suitable housings. The bearings are to be self-lubricating and easily renewable. The fan shall be so designed as to provide an efficient and simple lubricating system which does not require to be oiled or greased within a period at least one year. The fans shall be reasonably noiseless in operation and no grease or oil shall splash or be thrown out.

13 *Starting and regulating switch.*—The fan is to be supplied with a separate starting and regulating switch self-contained in a metal case of approved design suitable for wall-mounting. The regulator should provide for at least three speeds with an "off" position.

14 The switch knob or operating handle is to be provided with an indicator to show the step of the regulator on which the switch is set.

15 *Starting.*—The fan shall be capable of starting up from rest readily when 85 per cent of the rated voltage is applied to the terminals.

16 *Extent of work.*—Each fan shall be complete with all the necessary fittings and accessories including the regulator, suspension tube, ceiling canopy, insulated hanger etc., all enamelled to match the fan body.

17 *Name Plate.*—Each fan shall carry a metal name plate properly riveted or securely fixed and distinctly marked with the following particulars, both on the fan and regulator :—

- |                          |                   |
|--------------------------|-------------------|
| (1) Name of Manufacturer | (4) Voltage Range |
| (2) Serial Number        | (5) Frequency     |
| (3) Type Mark            |                   |

18 *Tests.*—The fans shall be tested before despatch in accordance with B.S.I. No. 367 and copies of the test certificate signed by a responsible officer of the Manufacturers shall be submitted.

19 Should the fans not conform to the requirements of this specifications or should any fan or its fittings fails to stand satisfactorily the tests specified above, such fan or fans shall be rejected.

20 *Guarantee.*—A guarantee shall be furnished for the satisfactory operation and also for free replacement of such

of the parts that prove faulty by reasons of inherent defects in design or workmanship or material within one year after their receipt.

21 *Drawings, etc.*—Outline plans giving all important overall dimensions of the fan and regulators, showing details of the lubricating system, etc., shall be submitted with the tender.

22 Full instructions for ceiling and setting the fan to work must be given.

**APPENDIX.**

The following schedule shall be filled in while tendering :

Item	Description	Particulars	Remarks
1	Make of fan and country of manufacture	.....	.....
2	Type of fan	.....	.....
3	Rated Voltage and frequency	.....	.....
4	Guaranteed air displacement in c.f.t. min. when the fan is run at rated voltage and frequency	.....	.....
5	Watts consumed per c.f.t. of air displaced at rated voltage and frequency.	.....	.....
6	Number of revolutions per min. at full speed and at different points of regulator.	.....	.....
7	Lowest speed of fan as a percentage of full speed	.....	.....
8	Type of Motor	.....	.....
9	Efficiency of motor at normal (full speed) of the fan.	.....	.....
10	Type of lubricating system	.....	.....
11	Type of bearings	.....	.....
12	Materials used for and thickness of the blades.	.....	.....
13	Number and sweep of blades	.....	.....
14	Type and particulars conductors used for motor.	.....	.....
15	Type of regulator (Rheostatic or Reactance coil type).	.....	.....
16	Number of contact steps provided on the regulator.	.....	.....
17	Details of resistances or choke coils and method of mounting.	.....	.....
18	Length, size and material of suspension tube offered as standard.	.....	.....

**SPECIFICATION FOR FANS WORKING ON UNIVERSAL CYCLES.**

1 The fans covered by this specification are required for use on 230 volts, S. Ph. Universal type (25 to 60 cycles).

2 They shall be manufactured in accordance with the latest B.S.I. specification.

3 The tenders shall be accompanied with descriptive literature, illustrations or photographs of the fans and regulators offered without which no tender will be considered. Tenderers shall fill in the accompanying data form and submit it along with their tenders.

4 *Quality of materials and workmanship.*—All materials used in the construction of the equipment forming part of the contract are to be of the best quality and workmanship suitable for continuous operation in the tropical climate of India.

5 It is to be noted that the insulating materials used shall be of class 'A'. The fans shall have the highest class finish and shall be smoothly painted with three coats and finished in best quality hard stoved black or dark green cellulose enamel.

6 *Interchangeability.*—Corresponding parts of similar fans, regulators, etc., are to be absolutely interchangeable in every respect.

7 *Motor.*—The motor shall be of the series type and totally enclosed, would for the above voltage and suitable for 25 to 60 cycles.

8 *Blades and Guards.*—The blades shall be of polished brass laquered or steel copper oxydised or any other approved material, shaped to give maximum volumetric efficiency, thoroughly stiff and well balanced to obviate troubles due to vibration. The fan shall have four blades mounted on a suitable spider. A strong and efficient brass or copper oxydised guard, with rings reasonably close to each other constructed of wire of sufficient thickness shall be fitted to prevent accidental contact with the blades.

9 *Bearing and Lubrication.*—The bearing shall be of the ball or roller type mounted in suitable housings. The bearings are to be self-lubricating by means of self-feeding grease and should be easily renewable. The fan should be so designed as to provide an efficient and simple lubricating

system which does not require to be oiled or greased for long periods.

10 *Shafts*.—The shaft shall be of mild steel and of sufficient diameter to prevent bending under all ordinary conditions of working and rough usage. The design of the fans shall be such that they are reasonably silent in operation and no grease or oil shall splash or be thrown out.

11 *Starting and Regulating Switch*.—The fan is to be supplied with a separate starting and regulating switch self contained and fixed in the pedestal. The regulator should provide for at least three speeds, with an 'off' position. The switch handle of approved insulating material shall be so placed that it can be easily and conveniently manipulated. The design shall be such that if the regulator is left in any position for a indefinite period the temperature rise in any part thereof shall not exceed the limit specified in B.S.I. No. 380.

12 *Starting*.—The fan shall be capable of starting up from rest when 80 per cent of the rated voltage is applied to the terminals.

13 *Extent of Work*.—Each fan shall be complete with all the necessary fittings, and accessories including the regulator.

14 *Pedestal and Trunnion*.—The pedestal and trunnion shall be of good quality malleable iron or cast steel of robust construction. The fan shall be readily adjustable for operation as either desk or bracket fan, and must have a wide range of both swivel and trunnion movement. All clamping devices shall be of strong and simple design, and so arranged that they shall not work loose owing to vibration or any other cause.

15 *Oscillating Mechanism*.—The fan shall be provided with an oscillating mechanism which shall not absorb more than 5 per cent of the rated electrical input.

16 *Name Plate*.—Each fan shall carry a metal name-plate properly rivetted, or securely fixed and distinctly marked with the following particulars:—

- |                         |                   |
|-------------------------|-------------------|
| (1) Name of manufacture | (4) Voltage Range |
| (2) Serial number       | (5) Frequency     |
| (3) Type mark           |                   |

17 *Tests*.—The fans shall be tested before despatch in accordance with the latest B.S.I. specification and copies of test certificate signed by a responsible officer of the manufacturers shall be submitted.

18 *Guarantee*.—A guarantee shall be furnished for the satisfactory operation and also the free replacement of such of the parts that prove faulty by reason of inherent defects in design or workmanship or material within one year after their receipt.

19 *Drawing etc.*.—Outline giving all important overall dimensions of the fan and regulator, showing details of the lubricating system, etc., shall be submitted with the sender.

#### APPENDIX.

The following schedule shall be filled in while tendering:—

Item	Description	Particulars	Remark
1	Make of fan and country of manufacture ...	.....	.....
2	Type of fan ...	.....	.....
3	Rated voltage and frequency ...	.....	.....
4	Rated watts taken by the fan at full speed and rated volts.	.....	.....
5	full speed R.P.M. ...	.....	.....
6	Speed variation in R.P.M. of fan at different points of the regulator ...	.....	.....
7	Air delivery in cubic feet per minute ...	.....	.....
	(a) at rated full speed ...	.....	.....
	(b) at rated 2nd speed ...	.....	.....
	(c) at rated 3rd speed ...	.....	.....
8	Maximum air velocity ...	.....	.....
9	Sweep and number of blades, the material of which they are made and thickness ...	.....	.....
10	No. of contacts provided on the regulator ...	.....	.....
11	Type of Motor ...	.....	.....
12	Type of bearings ...	.....	.....
13	System of lubrication ...	.....	.....
14	Type and particulars of conductors used for the motors.	.....	.....

*Notes*.—1 Samples should be furnished invariably along with your tender, failing which your tender will be liable to be overlooked.

2 Sales tax, if extra, shall be clearly specified separately.

3 Rates should be applicable for delivery f.o.r. any Railway Station on Southern Railway, Mysore State.

- The rates quoted shall hold good for the entire period from 18th March 1954 to 31st March 1955. The contract will be in force for one year.
- Each tenderer should deposit an earnest money of Rs. 200 into the Reserve Bank of India and the relative challan shall be enclosed to your tender, without which your tender will be liable to be overlooked without further reference to you.
- Related and revised offers will not be considered.
- The successful tenderers shall also be prepared to furnish a security deposit of Rs. 500 and execute a stamped agreement while placing orders.
- No definite number of fans to be supplied to the Departments during the year can be given. The number which is actually indentured and drawn by the Departments may be taken as the quantity to be contracted for.
- No enhancement over the prices quoted and accepted by the Stores Purchase Committee can be granted under any circumstances during the period of the contract.
- Quotations may be submitted in duplicate.
- Quotations will be opened at 3 P.M. on the next working day after the closing date.
- Whether your firm has been registered in this office as per new rules, may also be mentioned.

To

The firms dealing in Sluice Valves.

*Enquiry No. 12177.*

*Subject*.—C.I. Valves and Strainers required for Chikmagalur Division.

Gentlemen,

No. S.P.C. 57321-50. Please be good enough to intimate your best prices and the earliest time of delivery for the materials described in the undermentioned schedule in the form printed below.

It should be distinctly understood that the acceptance by us of your quotation will be subject to the following conditions:—

Withdrawal from the quotation after it is accepted or failure to make the supply within the specified time or according to specifications will entail cancellations of the order and purchases being made at your expense from other sources in addition to the levy of a penalty of 3 per cent of the value of the order as and by way of liquidated damages. In such an event, the Stores Purchase Committee reserve the right to remove your name from the list of approved firms.

The quotations should be superscribed "Quotations for C.I. Valves and Strainers required for Chikmagalur Division" with the above enquiry number.

This enquiry will be closed on the 2nd March 1954.

## SCHEDULE.

Item No.	Description of material offered	Quantity	Price quoted F.O.R.	Time of delivery
I. C.I. Sluice valves with tail pieces.—				
1	18" diam. size	2 Nos.	Chikmagalur	...
2	9" do	8 "	"	"
3	6" do	9 "	"	"
4	5" do	3 "	"	"
5	4" do	10 "	"	"
6	3" do	15 "	"	"
II. C.I. Strainers 12" diam.		2 "	"	"
III. C.I. Reflex Valve, 9" dia.		2 "	"	"
IV. C.I. Scour Valve, 3"		1 No.	"	"
V. Air-Valves —				
1	4" diam. size	2 Nos.	"	"
2	2" do	1 No.	"	"
3	1" do	3 Nos.	"	"
4	3" do	1 No.	"	"

The general specifications for the Valves are as noted below:—

The Valve should be of the standard water works pattern and of heavy and sturdy make with double flanges and wedge door type. The body to be of close grain C.I. of second casting. Spindle to be of rolled or forged brass or gun-metal with square threads and top fitted with C.I. cap. The diameter of the spindle for 3" valves to be 7/8" and bigger for bigger size valves.

Spindle nut to be gun-metal to suit the square threads of the spindle.

The direction of opening should be clockwise and arrow to be cast on the dome portion and also on the top C.I. gland piece. Flanges to be machined and holes drilled to suit B.S.S. class 'C'. The distance between the flanges shall be 9 3/8" for 3" valves and more for bigger size valves according to standard practice. Weight to be 68 lbs. for 3" valves and correspondingly more for bigger size valves. Packing to be securely packed so that the spindle or flanges may not be damaged in transit.

- N.B.—
1. The quotations with firm prices will be preferred.
  2. Sales-tax should be quoted separately.
  3. No enhancement of prices will be allowed after the acceptance of the tender.
  4. Quotations may be sent in duplicate.
  5. Whether your firm has been registered in the Stores Purchase Committee Office as per new rules, may be mentioned.
  6. The price quoted should hold good for a period of 3 months from the date of opening the tenders, failing which such quotations will not be considered.
  7. Quotations will be opened at 2 p.m. on the next working day after the closing date of the enquiry.
